DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, 4-8, 12-13, 16-18, 21-23, 25, 28, 31-32, 37-39 are, drawn to a method of identifying two or six row type in a barley or related *Triticeae* plant by using at least one molecular marker from figs. 1 and 2, and then generating said plant or reproductive material thereof.

Group II, claim(s) 1, 3-8, 14-15, 19-20, 26-27, 29-30, 33-36, drawn to drawn to a method of identifying FHB resistance or susceptibility in barley or related *Triticeae* plant by using at least one molecular marker from figs. 1 and 2, and then generating said plant or reproductive material thereof.

Group III, claim(s) 9-11 and 24, drawn to a reagent for identifying row type in barley or related *Triticeae* plant comprising an oligonucleotide.

Group IV, claim(s) 9-11 and 24, drawn to a reagent for identifying or FHB resistance in a barley or related *Triticeae* plant comprising an oligonucleotide.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of claim 1, drawn to a method of identifying row type or FHB resistance in barley, is known in the prior art as evidenced by Mesfin et al (Crop Science (2003), vol 43, pp. 307-318). Mefsin et al teach a method for detecting FHB resistance in a two rowed by six rowed barley population. Therefore, there is no common special technical feature between the groups that defines contribution over the prior art.

Therefore, inventions of Groups I-IV are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
